For: PERSONALIZED ALARM CLOCK
Art Unit: 2841 Docket No.: 234RK001

Declaration of Prior Invention in the United States to Overcome Cited Patent Pursuant to 37 C.F.R 1.131

Commissioner for Patents
PO Box 1450
Alexandria, VA 22313-1450

This declaration is to establish completion of the invention of this application in the United States at a date prior to April 23, 2002 that is the effective date of the prior art patent publication US 2003/0198137 A1 that was cited by the Examiner.

The person making this declaration is Joseph J. Mazzilli, the co-inventor.

This declaration is submitted prior to final rejection.

The statement below establishes the diligence of the applicants, from the time of their concept, to a time prior to the date of the reference up to the filing of this application

Statement

To establish the date of completion of the invention of this application, applicant submits as evidence a drawing of the invention and an invoice.

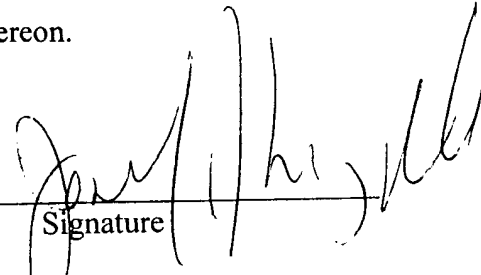

Attached is a drawing of the invention evidencing conception with the signature of co-inventor Joseph J. Mazzilli and witnessed by applicants' contractor Charles Colby.

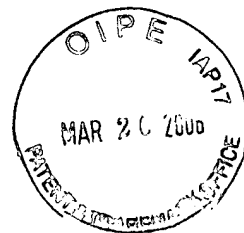

The invention as conceived was too large and generated too much heat thus making it unsafe to use. This chip technology made the invention safely useable without generating as much heat. In addition, this chip technology permitted the invention to be

used as a battery operated invention. New technology incorporated on one or two chips became available much later and was ordered and employed by the applicants.

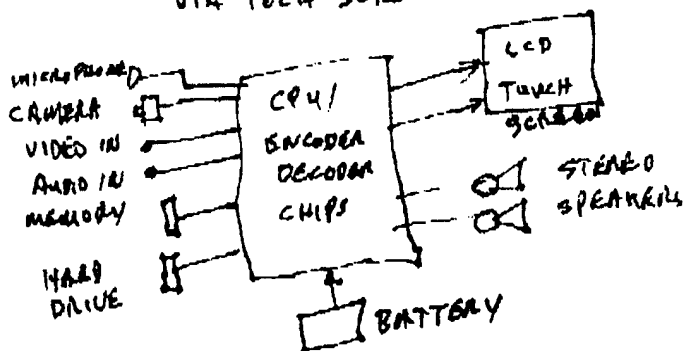

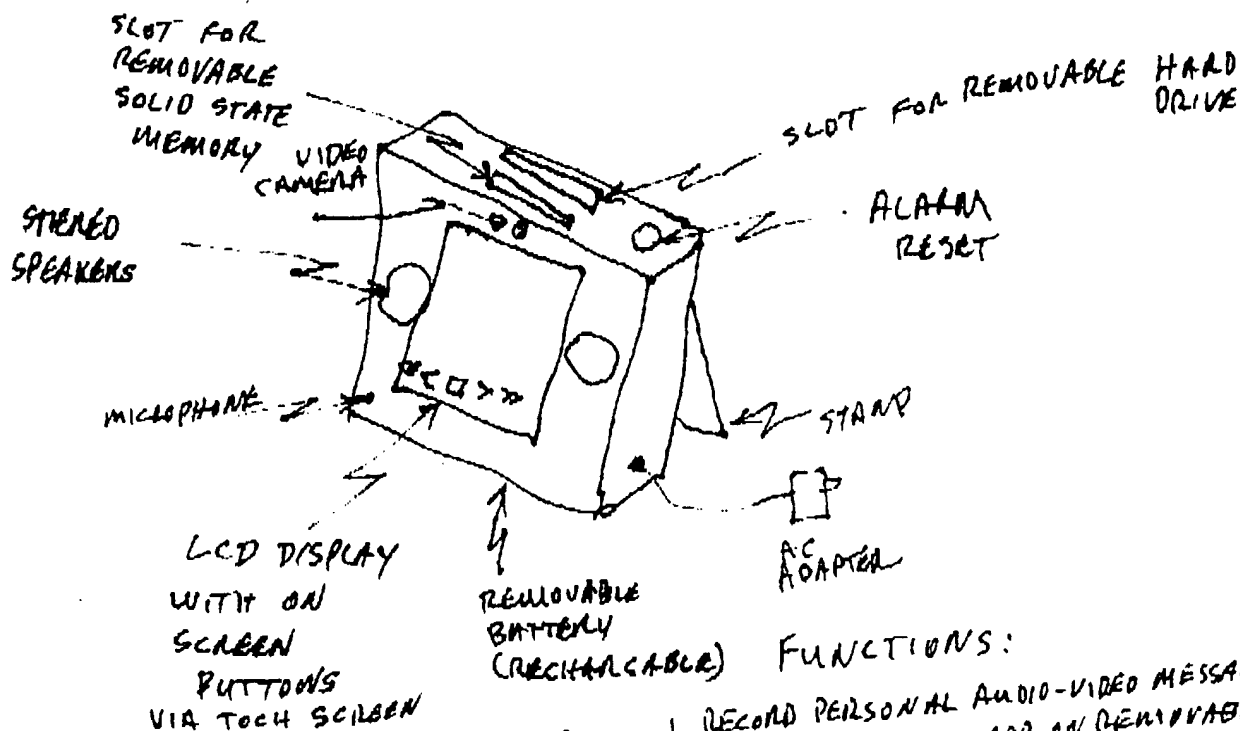

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
